3	<u>Notes</u> With the goal of making the quality assurance fields within CEDEN more user-friendly, the Water Boards are posting CEDEN data on the state’s open data portal with additional fields that categorize results in relation to quality assurance. These additional fields provide a tier and display what field and value contributed most to the tier ranking. While the new fields are currently posted, the process is still being refined. Feedback on the tiers and the columns and values that are considered is welcome. Please see the workbook containing the fields and values at the link, below.
